Jared Machado

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA (Remote)

January 2022 — January 2023

- Demonstrated leadership by collaborating with a team of developers to build modern and responsive web applications using agile methodologies.
- Utilized effective communication to drive the creation of semantically structured full-stack web applications, ensuring clear and open lines of dialogue with team members and stakeholders to understand project requirements and objectives.
- Employed strong teamwork skills to work alongside the development team, contributing to the creation of web applications that resulted in enhanced user experiences and improved website performance.
- Applied problem-solving abilities to deliver exceptional outcomes by implementing agile methodologies, such as SCRUM, to efficiently manage and complete projects, ensuring timely and successful project delivery

Best Buy, Altamonte Springs, FL — Customer Experience Specialist

- Recognized as the top performer for credit card acquisitions and annual membership sales in the month, earning the Employee of the Month award.
- Consistently achieved a perfect 100% Net Promoter Score (NPS) every quarter by proactively discerning customer requirements and strategizing for future needs.
- Enhanced the store's profitability by offering tailored, comprehensive solutions to customers, leading to reduced product returns and improved overall bottom-line performance.
- Facilitated the rapid onboarding of new team members within my department, fostering seamless collaboration, which resulted in exceptional customer experiences during seasonal events.

RECENT PROJECTS

OpenAi-Image-generator (REST API, React, Nodejs) – I built a user-friendly image synthesis application with the OpenAI Dall-E 2 API, converting text prompts into images. This involved web interface design, server setup, and seamless API integration, resulting in a responsive application for prompt-based image creation.

The Social Network - Developed a user-friendly social network using REST API, Ejs, Bootstrap, PassportAuth, MongoDB, Node.js, Express, and Cloudinary, enabling image uploads, post interactions, and strong data security with password hashing.
